Implement Future Sales Prediction using a suitable machine learning algorithm

CODE :

```
import numpy as np

# Month and sales
X = np.array([1, 2, 3, 4, 5, 6])
y = np.array([100, 120, 140, 160, 180, 200])

# Linear Regression
X1 = np.c_[np.ones(len(X)), X]
w = np.linalg.pinv(X1) @ y

# Predict next month
next_month = np.array([1, 7])
prediction = next_month @ w
print("Predicted Sales for Month 7:", round(prediction, 2))
```

OUTPUT

```
Predicted Sales for Month 7: 220.0
```

```
=== Code Execution Successful ===
```
