Write a program for the task of Credit Score Classification

Code :

```
# Credit Score Classification

income = 60000
age = 35
debt = 12000

if income >= 50000 and debt <= 15000:
    credit_score = "Good"
else:
    credit_score = "Poor"

print("Income:", income)
print("Age:", age)
print("Debt:", debt)
print("Credit Score:", credit_score)
```

Output :

```
Income: 60000
Age: 35
Debt: 12000
Credit Score: Good

=== Code Execution Successful ===
```
